---

### SUMMARY

Front-end engineer with 6+ years building high-performing, scalable, cloud-ready web applications using React, JavaScript, TypeScript, and Angular. Experienced leading developers, owning front-end architecture, running code reviews, and driving sprint planning. Strong background in performance optimization, accessibility, and reusable UI systems for cloud-native SaaS products.

### EXPERIENCE

#### Software Developer — ImmplyCloud India Private Limited

Nov 2022 — Present

- Build cross-browser web interfaces with React, Angular, and modern HTML5/CSS3/JavaScript; own responsive design principles across platforms.
- Cut page load time by 30% with a lazy-loading rollout, improving customer satisfaction and retention.
- Led a flagship product redesign — collaborative prototyping and usability testing drove a 12% increase in engagement and a 10% drop in bounce rate.

#### UI Developer — Immply India Technology Private Limited

Sep 2021 — Oct 2022

- Developed and optimized interfaces for a client platform in an agile environment; integrated RESTful APIs using test-driven development.
- Ran peer code reviews holding features to WCAG accessibility standards; drove UI/UX improvements that increased client engagement by 15%.
- Investigated and resolved escalated production bugs; mentored junior developers on WordPress and clean JavaScript practices.

#### Software Engineer — Tecversa IT Solutions

Jan 2019 — Feb 2021

- Designed single-page applications with Angular and React across audit, banking, insurance, and finance domains.
- Reworked JSON parsing for more effective data handling, improving performance by 20%.
- Migrated a legacy interface to React and built data-driven SEO initiatives that grew organic traffic by 25%.

#### Tag Developer — EXL TechnoSolutions Private Limited

Jan 2018 — Jan 2019

- Implemented and maintained media and third-party tags via Google Tag Manager; coded tag deployments with HTML, CSS, JavaScript, and jQuery.
- Caught a conversion-tracking tag failing to fire on purchase pages — a gap that was quietly skewing revenue reporting.

### SKILLS

**Core** — HTML5, CSS3, JavaScript, TypeScript, Sass

**Frameworks** — React, Redux, Angular, Tailwind CSS, Bootstrap

**Backend** — Node.js, Python, FastAPI, MongoDB, Azure

**Testing** — Jest, Jasmine, Postman

**Tooling** — Webpack, Vite, Gulp, Figma, VS Code

**Other** — REST APIs, GitHub Actions, SVN, WinSCP

### EDUCATION

#### Bachelor of Engineering (IT) — SRIT

June 2015
